

4' X 8' BASIC HOG TRAP

- Constructed of 1 1/4" x 1 1/4" x 1/8" Galvanized angle iron
- 4" x 4" 6 gauge wire panel
- Cable attaches to front of trap for trip mechanism
- Simple design –easy to use

4' X 8' ROOTER HOG TRAP

SALOON HOG TRAP GATE

RANGER TRAP GATES ARE 5' TALL

The **Saloon** gate allows for one way entry to the pen. A trip mechanism allows for trap to be set, but allows continuous entry once tripped.

The **Rooter** gate allows for continuous entry. To train hogs a chain loop allows one door to remain open until you are ready to trap.

ROOTER HOG TRAP GATE

IN/ OUT SALOON HOG TRAP GATE

The **In/ Out** gate allows hogs to be trained. Once trained drop pins are applied to make gate one way.

The **V- Trap** can be set with a trip mechanism, but will allow hogs to continue pushing into pen. The contour of pen creates a natural flow for hogs to enter.

V- TRAP HOG GATE
